FEATURES

MULTIFUNCTIONAL
EMOLLIENT

APPLICATION
*Haircare, Suncare,
Skincare, Colour
Cosmetics*

CLEAR, ODOUR &
COLOUR FREE

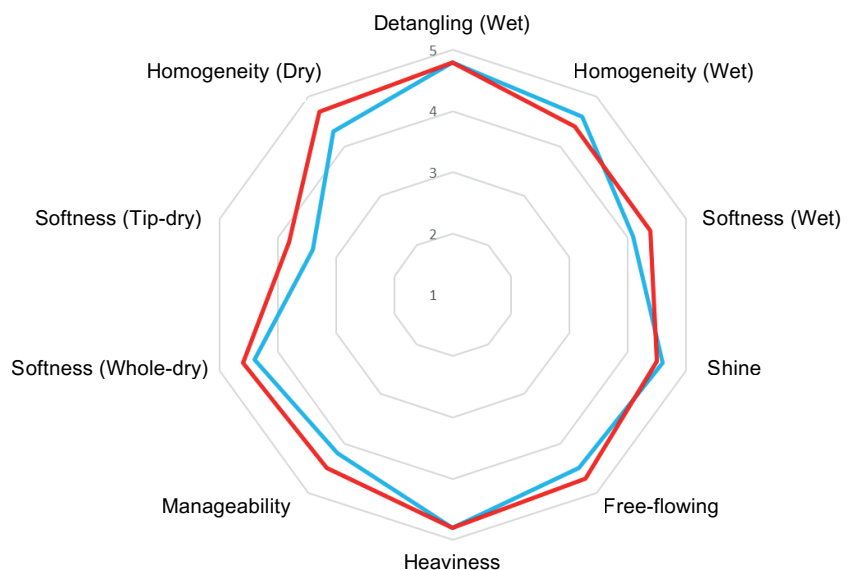

GREEN INNOVATION
*High-performance,
Naturally Sustainable*

NATURAL DIMETHICONE ALTERNATIVE

Derived from **castor oil**, WILSILK Sense is a **plant-based emollient** that conditions, enhances shine, improves spreadability, and solubilizes UV filters. As a natural Dimethicone alternative, it offers **comparable and often superior performance** in skin, hair, and color cosmetics.

MULTIFUNCTIONAL CARE FOR HAIR & SKIN

WILSILK Sense **keeps hair smooth, shiny, and manageable** by enhancing combability and softness while preventing buildup and dullness, allowing nutrients to reach the hair shaft. In sun care, it **dissolves UV filters** and replaces synthetic oils like C12-15 Alkyl Benzoate to deliver lighter, safer protection.

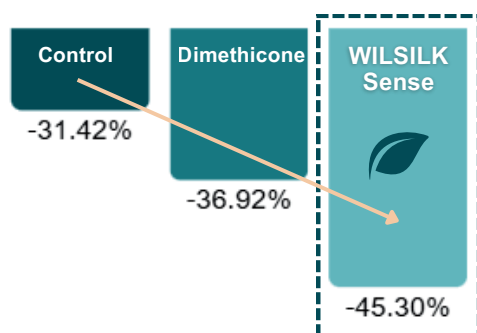

SMOOTHER COMBING AFTER WASH

WILSILK Sense improves wet and dry combability, helping hair stay soft, manageable, and easy to style.

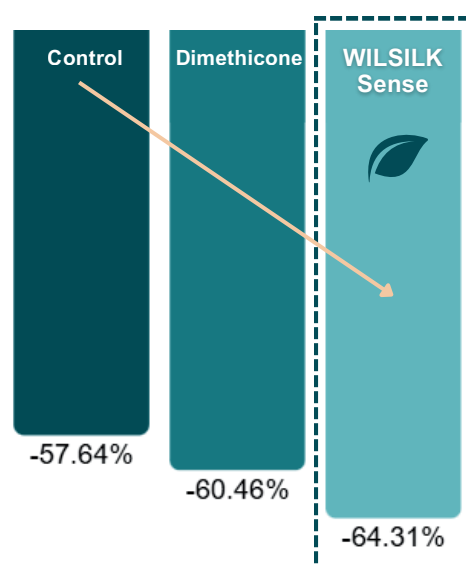

DETANGLING MADE EASIER

At 2% usage in conditioners, WILSILK Sense **reduces combing force more effectively** than Dimethicone, ensuring superior detangling performance.

Dry Combing Force Reduction (Avg Peak Load)

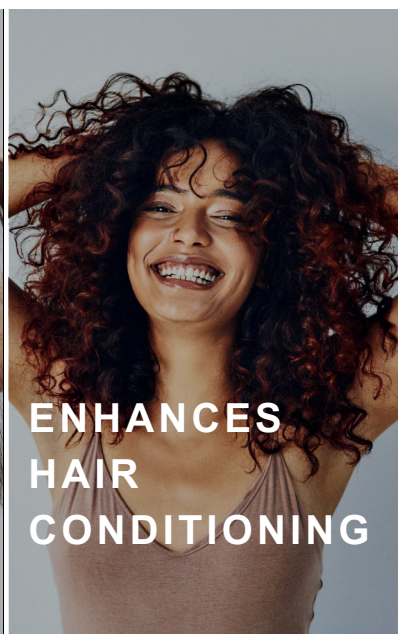

Wet Combing Force Reduction (Avg Peak Load)

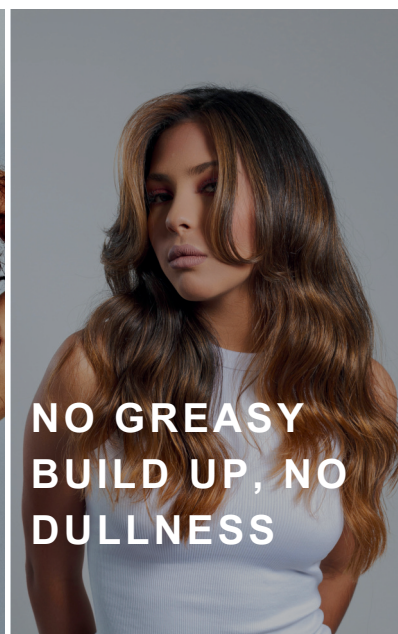

With WILSILK Sense, tangles disappear with ease.
